BCSSE 2008-NSSE 2009 Respondent Characteristics  
October 2009

This report contains the overall results for all institutions that participated in BCSSE 2008 and NSSE 2009. Respondents to either survey that were not at an institution that did both surveys, are not included in any of these results. The *BCSSE 2008-NSSE 2009 Combined Report* contains two sections, cross-sectional results and longitudinal results. The *cross-sectional* results include frequencies from *all* respondents at institutions that participated in both BCSSE and NSSE. For comparison purposes, only similar items on both instruments are included in this section (there were 23 items in the BCSSE survey identical or similar to items in the NSSE survey). Using all the BCSSE and NSSE data provides the best estimates of incoming first-year student characteristics and their end-of-year engagement at BCSSE-NSSE institutions.

The *longitudinal* results in your BCSSE08-NSSE09 Combined Report already included comparative results with similar institutions with same Carnegie classification. This report includes the overall comparative results for the respondent characteristics, the cross-sectional frequencies, and the longitudinal results for all BCSSE-NSSE institutions where data could be matched at the student level.

BCSSE 2008-NSSE 2009 Combined Report  
Cross-Sectional and Longitudinal Results  
October 2009

The cross-sectional results are based on *all* first-year student respondents from institutions that participated in BCSSE 2008 and NSSE 2009 administrations (in contrast to the longitudinal results which contain only *matched* data). These data provide the best estimates of the first-year students' pre-college characteristics and their engagement during the first year. By presenting BCSSE-NSSE cross-sectional results side-by-side, you can identify areas of correspondence as well as gaps in engagement to develop a better understanding of the first-year student experience.

**Variables**

The items from the BCSSE and NSSE surveys appear in the left column of the report with same or similar wording as they appear on the instruments.

**Response Options**

Response options presented on the survey were collapsed into fewer categories for reporting purposes.

**Data Source**

These columns present the overall BCSSE 2008 frequencies and NSSE 2009 frequencies.

<sup>1</sup> Blank cells indicate BCSSE items with no similar item on NSSE.

These longitudinal results contain matched data from all first-year students who completed *both* the BCSSE 2008 and NSSE 2009 surveys. The purpose of this report is to analyze the relationships between incoming student characteristics and their reported engagement near the end of their first year. With longitudinal data, you can more effectively identify how students with varying levels of pre-college characteristics were actually engaged during their first year of college.

Six BCSSE scales are categorized into quartile ranges based on the lower 25 percent (Low25), the middle 50 percent (Mid50), and the upper 25 percent (Top25) of respondents.

### **BCSSE Scales**

The following BCSSE scales were constructed by converting the responses for each item to a 0-10 range. A mean scale score was then calculated for each student. Below is a brief description of each scale with the component BCSSE items in parentheses.

<i>High School Academic Engagement</i>	Student engagement in educationally relevant activities during the last year of high school. (hreadasg, hwrite5, hwrite5m, hacadpr, hclquest, hclprese, hfacgrad, hclassgr, hoccgrp, hrewropa, hfacidea, hoocidea)
<i>Expected Academic Engagement</i>	Expected engagement in educationally relevant behaviors during the first year of college. (cacadpr, cclquest, cclprese, cfacgrad, cclassgr, coccgrp, cfacidea, coocidea)
<i>Expected Academic Perseverance</i>	Student certainty that they will persist in the face of academic adversity. (cotherint, cfindinfo, ccourdis, caskinst, cfinish, cstaypos)
<i>Expected Academic Difficulty</i>	Expected academic difficulty during the first year of college. (clearnma, cmantime, cgethelp, cintfac)
<i>Perceived Academic Preparation</i>	Student perception of their academic preparation. (cgnwrite, cgnspeak, cgnanaly, cgnquant, cgncompt, cgnother, cgningq)
<i>Importance of Campus Environment</i>	Student-rated importance that the institution provides a challenging and supportive environment. (cenvscho, cenvsupr, cenvidiv, cenvnaca, cenvsoca, cenveven)

---

### **NSSE Benchmarks of Effective Educational Practice**

Also included in this report are four of the five NSSE Benchmarks, with the component items in parentheses: <sup>1</sup>

<i>Level of Academic Challenge (adjusted)</i>	Engagement in challenging and intellectually diverse work. (readasgn, writemor, writemid, writesml, analyze, synthesize, evaluate, applying, workhard, acadpr01, envschol)
<i>Active &amp; Collaborative Learning:</i>	Engagement in collaborative learning and learning in different settings. (clquest, clpresen, classgrp, occgrp, tutor, commproj, oocideas)
<i>Student-Faculty Interaction</i>	Student engagement with faculty as instructors, role models, and mentors. (facgrade, facideas, facplans, facfeed, facother, resrch04)
<i>Supportive Campus Environment</i>	Quality of campus environment to support student success. (envsocal, envsuprt, envnacad, envstu, envfac, envadm)

<sup>1</sup> The benchmark "Enriching Educational Experiences" is not included in this section of the report given that it measures the participation in many activities not typically completed by first-year students (internships, capstone courses, study abroad, etc).
